

Osprey Flight Solutions

A new age for aviation risk management

Osprey Reports

A guide to your essential aviation
alerting system

PRIVATE & CONFIDENTIAL

Introduction

Osprey Reports, are part of the :Core offering, they are detailed risk assessments that keep you informed of emerging incidents and disruptive events affecting countries, airports and airspace. The assessments also include mitigation measures and regulatory advice.

What will be covered:

- How to download risk assessments for country, airspace, and airport.
- How to customise your reports
- Access to our methodology document

How To

Running Country Reports

1. Click on Reports
2. World Map will appear
3. Type the Country in the search bar, a list will appear on the right-hand side or click on the area of the interactive map
4. A modal will appear with your Standard Report Template
5. Click Report
6. PDF report will open in new browser window.

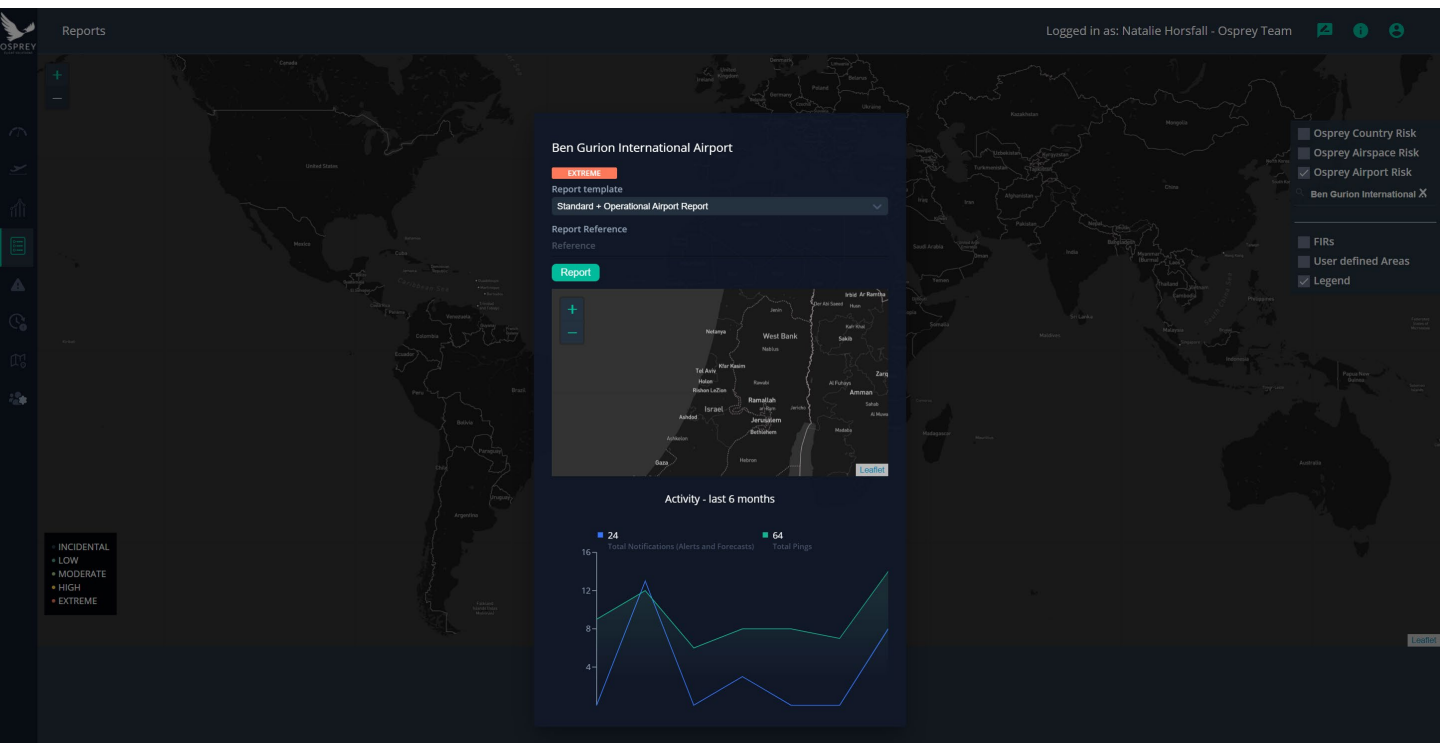

Running Airspace Reports

1. Click on Reports
2. World Map will appear
3. Type the Airspace in the search bar, a list will appear on the right-hand side or click on the area of the interactive map
4. Click on Airspace of choice
5. A modal will appear with your Standard Report Template's
6. Click on Report button (Top)
7. PDF report will open in a new browser window.

Running Airport Reports

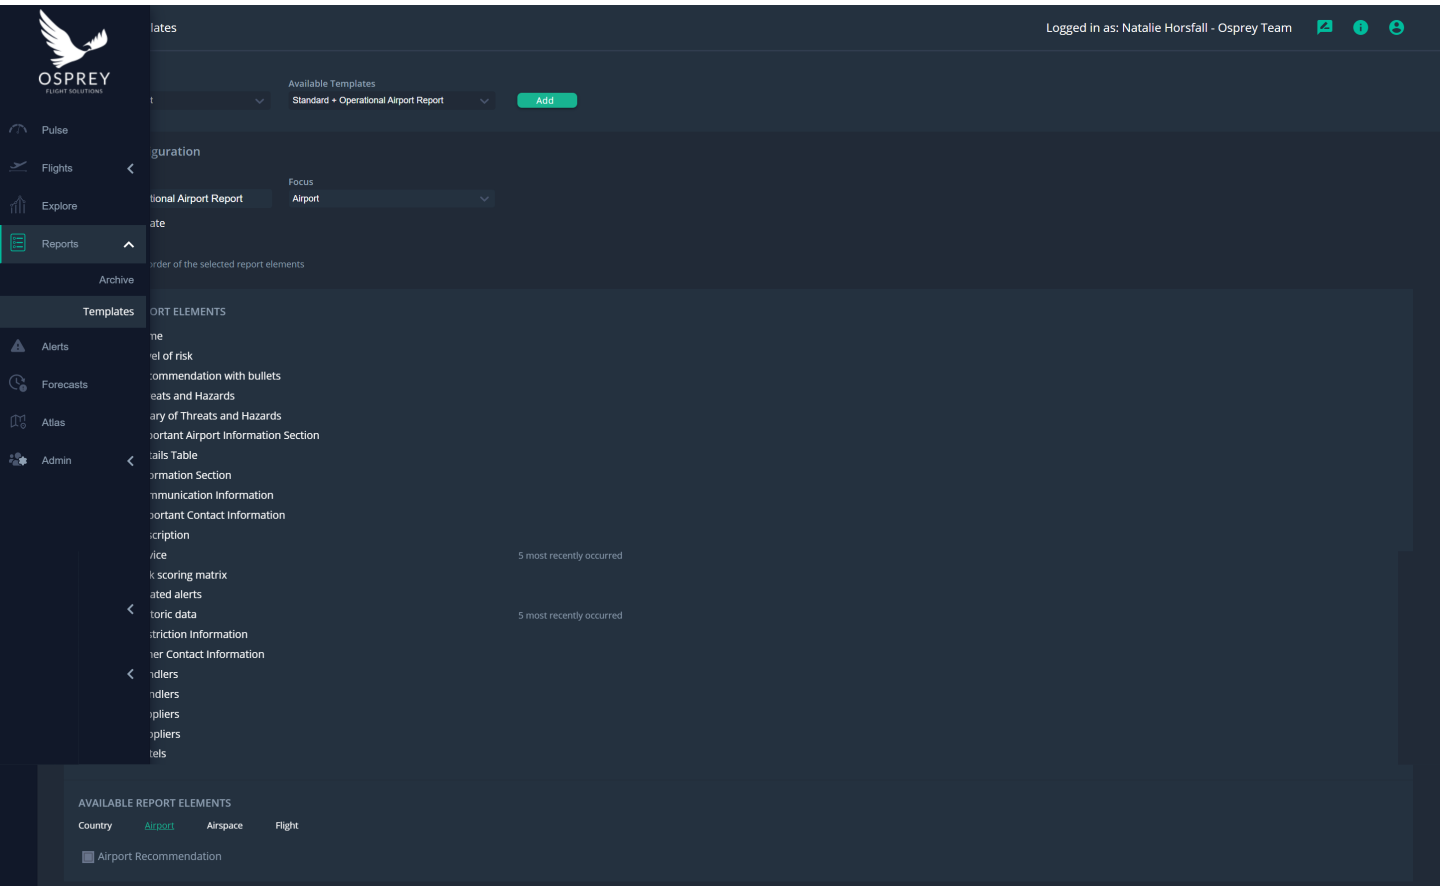

1. Click on reports
2. Type the airport in the search bar, a list will appear
3. Choose your Airport (Either by name or ICAO/ IATA code in the search bar)
4. Once the modal appears choose your template (**Standard or Standard + Operational Report**)
5. Click Report
6. PDF report will open in a new tab.

Standard + Operation report: The reports will now provide you with a combination of security risk advice and operational information in one place to make this process more efficient.

Creating a Template

1. Click on Reports > Templates
 - 1) Click Add
 - 2) Pick a name to call it.
 - 3) Choose your area of focus on the drop-down menu.
 - 4) If you want to default this, you can tick the box
 - 5) Select by ticking the box of the report element you want to include.
2. Click save

Conclusion

In Reports you can run a detailed risk assessment for any Country, Airspace or Airport, providing you with an enhanced understanding and a comprehensive summary of risk.
