

Conflict Zone Overflight Risk Management Training Course

Delivered in-person by our experts, bespoke to your operations

Use predictive intelligence to turn foresight into action and safeguard your operations

The Conflict Zone Overflight Risk Management Course is a highly interactive two-day programme designed and delivered by Osprey specialists with backgrounds across aviation safety and security, military and air force operations, intelligence analysis, and regulatory oversight. The course covers the full scope of overflight risk management and includes practical group exercises focused on real-world conflict zone risk assessment.

- Eight modules, delivered over two days, covering regulations, weapon systems, Open-source intelligence, risk assessment, and decision-making
- Tailored to the operator's specific requirements and risk assessment methodology, including a practical group exercise: real-world conflict zone airspace risk assessment
- Developed by the only three known academics globally specialising in conflict zone overflight risk, a unique concentration of expertise unmatched anywhere in the industry.

The training is highly interactive and includes practical group exercises centered on real-world overflight risk assessment and management. The course structure is as follows:

Introduction	<ul style="list-style-type: none"> • Introductions of facilitators and participants • Training objectives, agenda and timetable
Module 1. What is a Conflict Zone and Conflict Zone Risk Management?	<ul style="list-style-type: none"> • What is conflict zone overflight risk • Historical examples of misidentification and shootdowns • Roles and responsibilities • Basics of regulatory framework and Information sharing
Module 2. Threats Associated to Overflight Risk	<ul style="list-style-type: none"> • Threat identification • Weapons • Air-to-Air Defense
Module 3 .Principles of Open-Source Intelligence (OSINT)	<ul style="list-style-type: none"> • OSINT: Foundational understanding • Security risks & aviation events • Traditional approach to OSINT • Key principles of OSINT • Osprey's approach to OSINT
Module 4. Decision-Making in Overflight Risk	<ul style="list-style-type: none"> • Risk and uncertainty • Interpreting intelligence • Escalation triggers and immediate actions • Roles and responsibilities • Mitigating measures, de-escalation triggers, timelines and responsibilities
Module 5. Conflict Zone Risk Assessment Methodologies	<ul style="list-style-type: none"> • Operations over or near conflict zones • Different methodologies • Airspace assessment criteria • Osprey risk rating definitions
Module 6. Risk Assessment Activity	<ul style="list-style-type: none"> • Group activity and discussion (tailored to clients current risk methodology).
Module 7. Group Exercises	<ul style="list-style-type: none"> • Practical exercise: conflict zone / airspace risk • Utilisation of AI in your Risk Assessment
Module 8. Conclusions and Course Summary	<ul style="list-style-type: none"> • Summary, conclusions, key takeaways
